ABSTRACT

As a port of freight transport, the existence of PT. Terminal Peti Kemas Semarang is needed by the industry to support the expedite delivery of goods. Container delivery is very important for PT. Terminal Peti Kemas Semarang which is a container operator at Tanjung Emas port. The unfavorable accuracy of the container location will slow down the delivery performance. Therefore, it is necessary to analyze the arrangement system of import container in container yard to facilitate delivery at PT. Terminal Peti Kemas Semarang. The purpose of this research is to know the system of container import arrangement in container yard in order to expedite delivery, to know the factors that influence the system of container import arrangement on container yard in order to expedite the delivery and to know the impact of the container import system in the container yard to expedite delivery at PT. Terminal Peti Kemas Semarang.

This research method is descriptive qualitative method, where researcher take data by conducting observation so that research conducted in accordance with method used. In addition, data collection is done by interviewing, field research, library research and documentation in the form of data collected by the author to facilitate the delivery of ships at PT. Terminal Peti Kemas Semarang.

The research results showed that, container arrangement system imports on container yard to facilitate delivery activities in PT. Terminal Peti Kumas Semarang already using automation system with Automated Rubber Tired Gantry Cranes, but not yet applied in CY 04 and CY 06. Factors that affect container container import system on container yard to facilitate delivery activity at PT. Terminal Peti Kemas Semarang is from human resources and facilities and infrastructure. The impact of import container arrangement system on container yard to facilitate delivery at PT. Terminal Peti Kemas Semarang is a chaotic position of import container so the truck will wait for the search from the RTG operator to find the container to be picked up.

Keywords: Container Import, Container Yard, Delivery.
