Penulis : *Excuse me Chief, Let me to asking someting to you about salt sargo operation?*

Chief Officer : *Yes cadet, go ahead,*

Penulis : *Why salt cargo need a preventative action before loading in the bulk?*

Chief Officer : *Yes, because salt have a corrosive substance that can damage the cargo hold.*

Penulis : *So, how to prevention the damage?*

Chief Officer : *We must make a limecoating liquid who make from suger salt and water, and we spray the liquid to the cargo hold by wilden pump. "Lime coating is one of procedures before loading of salt in bulk. For protect wall of cargo hold from salt characteristic. For make lime coating we need: lime powder, powder milk, suger, drum, fresh water. About 40*

kg Lime powder mixed with a half of water. Mixing milk powder about 40 kg, sugar 50 kg, and mixed until easy to sprayed in wall of cargo hold with wilden pump.

Penulis : *Yes chief thank you for the information.*

Chief Officer : *Yes cadet, You are welcome.*

Penulis : *Excuse me Chief, i want to asking someting to you, why we have some trouble during preparation of cargo salt?*

Chief Officer : *First, we dont have enough time to preparation because i also have one a half day to prepare. We only have a day to prepare all cargo holds from Himekawa. However, I expected that our crew can completely do this. Just show our good teamwork in this voyage. We have to help each other to finish this job quickly.*

Second, we dont have complate equipment to prepare the hold, because the deck requisation not yet onboard. There is a lot of our cleaning equipments have broken. I've ever sent a requisition to company but until now there was no any

equipment on board. So we have to repair it as capable as we could using another materials available on board.

Third, i dont make a good work planing to the crew for prepare the hold.

Penulis : *Do you check the hold before surveyor come on board?*

Chief Officer : *I will check all the progress of this activity. If there is an deficiency by surveyor, it was by my mistake because I didn't take participate to wash and lime coat the hold.*

I didn't enter the cargo hold no. I because when I checked it from above it has covered up with lime coating and ready for salt loading. I was careless because the color of last cargo is same as the color of lime coating layer.

Penulis : *Yes sir , i understand, Thank you sir.*

Chief Officer : *Yes you are welcome cadet..*
