LAMPIRAN 3
Gambar Pengetesan Injektor

Using tools:
- Fuel valve testing device
- Testing hose
- Feeler gauge
- Eye bolt
- Valve holder

Name of parts:
1. Fuel injection valve
2. Adjusting screw
3. Lock nut

Atomization test
The fuel shall be uniformly atomized. (in relation with the needle valve movement and the injection port size)
No dripping is permitted. (in relation with the seat face)
Check the atomization condition.

(2) and (3) are to be so set that the valve opening pressure becomes 320 kg/cm².
