Number : 15/ICONECT.2/FKIP/III/2019  
Subject : **Letter of Acceptance**

Dear  
Darul Prayogo

On behalf of the organizing committee of the 2nd International Conference On Education, Culture And Technology (2<sup>nd</sup> iconect) 2019, we would like to express our highest appreciation for your paper submission that we have received. We are also very pleased to inform you that your paper has been reviewed by our reviewer committee.

**Title : Comparison Between How To Learn Using The Book Media With The Internet Media Towards The Results Of Learning Learning In Industrial Chemistry In PIP Semarang**

**Status : Accepted**

Finally, we would like to take to this opportunity to thank for your interest in participating and presenting your research work at the ICONECT 2019. We look forward to seeing you at the conference.

Yours sincerely,  
INTERNATIONAL CONFERENCE  
EDUCATION CULTURE AND TECHNOLOGY  
  
Dr. Irfai Fathurohman, M.Pd  
Chairperson of ICONECT 2019

## ICONECT 2019

The 2nd International Conference Education Culture and  
Technology

Kudus, Indonesia  
August 20th-21st, 2019

The 2<sup>nd</sup> International Conference Education Culture and Technology (ICONECT)

"Teaching Learning Reformation Based on Local Indigenous Norm in Industrial Revolution 4.0 Era"

Kadus, August 20<sup>th</sup>-21<sup>st</sup>, 2019

Keynote Speaker:

Prof. Anisa Taouil Hasoema  
Prof. Craig Deed, Ph.D  
Prof. Dr. Aida Suraya Md. Yunus  
Dr. Sri Utaminingsih, M.Pd

Organizers:

Elementary Education Magister  
Elementary Teacher Education  
Indonesian Language Education  
Mathematics Education

Universitas Maria Kudus

Savitri Wanbulandari, M.Pd  
Siti Masfiah, M.Pd

Preface

Education provides us with insights and understanding in facing the stream of life. An education process which is indicated by feedback or input from education user is one of many factors that could be used in reflection for improving education. As a vessel which contains aspects and values of education, characteristics or identity of education always emerges in every era. Ideal characteristic of education would emerge as an answer towards the need of education process.

Local wisdom, one of important aspects of culture, needs to be maintained and employed as learning material because it embodies noble values that could be introduced in the education world. Local wisdom could be employed as a worldview, providing learners with knowledge regarding exemplary customs which could be adopted. A reformation in learning is needed in order to facilitate advancement and innovation. Ineffective, underperforming aspects of learning should be improved so that on the whole learning will produce learning outcomes which embody values, messages and knowledge which could be applied in society.

The importance of the quality of learning which is based on process, action and outcome undoubtedly requires proper, applicable learning strategy and model. Targeted learning outcome serves as an indicator that learning should be systematically structured. The role of education should provide solution and advancement in the education world so that every problem present could be handled faster.

Any phenomenon in life may be used as basic input for learning. Any advancement and refinement of education should be based on directed input and consideration, therefore producing necessary feedback for improving the quality of education. One learning method based on the Industry Revolution 4.0 is collaborating learning with learning technology. The effective usage of technology in learning makes learning process more effective, efficient and applicable in daily life.

The need of technology in learning is inevitable. Thus, every educator is obliged to adapt himself/herself with its current development. Since technology could be used for fulfilling learner needs and education, it should be continuously developed and improved. Local wisdom which upholds noble values and lessons may also be included in learning. Collaboration between local wisdom and learning technology in the era of Industry Revolution 4.0 should provide a clear illustration that any embodiment of local wisdom could be applied in any learning context.

Kadus, August 20<sup>th</sup>, 2019

Chairman of ICONECT

Dr. Irfal Fathorohman, M.Pd.

**EAI Computing and Communication in Emerging Regions - CCER**

The EAI Computing and Communication in Emerging Regions Series have already published proceedings from more than 20 conferences of various scopes. In line with EAI's values of equality and openness, their mission is to give greater visibility to research and innovation from emerging regions and share the knowledge worldwide. The audience for the proceedings consists of researchers, industry professionals, graduate students as well as practitioners in various fields. CCER harnesses the Open Access platform to simultaneously guarantee free exposure and distribution, under the Creative Commons license. In addition to being available in European Union Digital Library, the proceedings are disseminated to an even wider audience by being indexed in ProQuest, CNKI, Google Scholar and EBSCO.

**European Alliance for Innovation**

EAI is a non-profit organization with free membership and the largest open professional society for advancing research careers through community collaboration and fair recognition. Members benefit from finding feedback and mentorship for their work and they are guaranteed to be evaluated fairly, transparently, and objectively through community.

**Abstract.** Learning is a process of changing one's personality where this change is in the form of improving quality, such as increasing knowledge, skills, thinking, understanding, attitudes, and various other abilities. Target of this research is that users cadet PIP Semarang. Researchers felt to do evaluation in teaching style following changing era dynamics. Question validity and reliability determined by 0.97 and 0.90. Test result shows that all question is valid and reliable. This research is quantitative research using correlational survey method. Research shows that cadet need internet to help them study in studying process. There's a difference between study achievement using press media and online in PIP Semarang, average study result using media is 51,25 meanwhile online media is 67,81. There's a difference between study achievement using press media and online in PIP Semarang a need to be fixed in education field following the changing of era. Give permit using laptop with control from PAKM, and use of private security. Use of modern and internet in group to increase study activities.

**Keywords:** Learn using the book, Internet Media, Study Result.

### 1. Introduction

Now we can access unlimited information on the internet. There is no more special material that can only be enjoyed by certain groups. Book is an information window. In this modern era, internet needed in education. Not only by reading book that can process and get information, internet can be larger than book as source of information. Information searching from internet is more faster and easy to do. Cadet has his way to get knowledge beside from teacher in campus.

Writer will point and compare study method using online with book media. Is using internet media beside lesson book, cadet will be more good in achievement or the other way around? How cadet study result that everyday commonly use internet with cadet that commonly use book media?

### 2. Literature Review

Cadet get knowledge from the teacher in the class, they are pressed to use knowledge following changing era. Hariyanto (2011: 9) said that "Study is an activity or a process to

getting knowledge, increase skill, fix manner, attitude and strength then personality". Study result is abilities that student have after receiving study experience (Suljana 2004: 22).

### 3. Research Methodology

This research, need quantitative research with correlational method with searching connected to cadet way to study that use book with online media regarding to cadet result. This population research is all first term cadet PIP Semarang. Sample taking technique using Cluster Proportional Random Sampling.

### 4. Analysis and Discussion

	Mean	Std. Deviation	N
VAR000001	51,25	17,244	48
VAR000002	67,81	12,900	48

Average test score using press media is 51,25  
Average test score using online media is 67,81

	F	Sig.	t	df	Sig. (2-tailed)	Mean Difference	Std. Error Difference	95% Confidence Interval of the Difference	
								Lower	Upper
VAR00001 Equal variances assumed	5.326	.026	94	0.000	-16.563	5.110	22.737	10.368	
VAR00001 Equal variances not assumed	5.326	.026	87.125	0.000	-16.563	5.110	22.744	10.361	

Output independent sample T-test above, got sig score. (2-tailed) 0,000 < 0,05, so according to decision taken in independent sample T-test, so can be concluded Ho got declined, Ha got accepted, that means there's a difference in study achievement using press media and online.

T-score counted negative mean average score using press media is lower than average score in online media.

Mean difference is 16,563 (67,81-51,25) and difference between 10,368 until 22,737 (can be seen on lower and upper).

### 5. Closing

#### A. Conclusion

1. Cadet need internet to help the learning process
2. There's a difference between study achievement using press media and online media in Politeknik Ilmu Pelayaran (PIP) Semarang, show with average study result using press media is 51,25 meanwhile average study result using online media is 67,81.

#### B. Suggestions

1. Need fast used of internet for cadet to help studying process
2. There's a difference between study achievement using press media and online in PIP Semarang that need to be fixed in education field following the changing of era.
3. Give permit using laptop with control from PAKM, and using private security.
4. Use of modern and internet in group to increase studying activity.
